Dear All,

I am working on health insurance coverage for Rwanda using the Rwanda 2014-15 DHS. I am trying to reproduce table 2.15 from the survey report but I cannot health insurance information in either the male or female recode files. Also, the individual recode documentation indicates that health insurance information was collected at the household level. Therefore, how was table 2.15 in page 56 and 57 of the final Rwanda 2014-15 DHS survey report generated?
