## Subject: Malaria microscopy results MIS 2016 Ghana Posted by PunamA on Tue, 15 Aug 2017 19:29:45 GMT View Forum Message <> Reply to Message

Hi,

I have noticed that you recently published the Ghana MIS 2016 survey and GPS. However, upon checking the database i realised the microscopy results are not available and the RDT results are too few to be correct in the children dataset. I would like to know if you have an estimated date when the microscopy or RDT results will be updated/provided?
