Following is a response from Senior DHS Specialist, Ladys Ortiz:

As part of the changes of the DHS woman questionnaire for phase 7, variables m50, M51 and M52 were removed. Woman's postnatal checkup information can now be found in variables M62 and M66. M62 had information for women with delivery at a health facility and M66 for women with delivery at home.

Concerning the numbers you can't replicate, it will be very useful if you'd make reference to the table number (s) you are trying to match in the final report.
