Hello!

I submitted a request for access to a most of the information available for the 2014 Ghana DHS. I received an email requesting more information in order to obtain access to the HIV data, but I did not receive a request to provide additional information regarding the GPS data. However, when I logged into my account this morning I saw a note requesting more information in order to have access to the GPS data. Thus, I added another paragraph to the description of my study. Is there anything else that I need to provide in order to obtain access to GPS data?

Thank you for your time.
