Dear User,

A response from Dr. Tom Pullum:

Quote:

I am not sure what you want to do. I hope you know that v367 refers only to the most recent birth. The question is not asked about any other births. I don't know what your variable "kids" is supposed to be. The other two variables seem to duplicate each other--when one is 1 the other is 0. The following may help. Good luck.
