---

Hello.

I am working with the Rwanda DHS 2014-2015 data set, and I need to get the number of all children under age 2 (as in table 11.3, last column). However, I am getting a higher number (3348) compared to the number in the table (3222). I need assistance on this.

I have used the following syntax:

```
DATASET ACTIVATE DataSet1.  
COMPUTE WGT=V005/1000000.  
EXECUTE.
```

```
WEIGHT BY WGT.
```

```
COMPUTE Age_months=V008 - B3.  
EXECUTE.
```

```
USE ALL.  
COMPUTE filter_$(Age_months < 24).  
VARIABLE LABELS filter_$ 'Age_months < 24 (FILTER)'.  
VALUE LABELS filter_$ 0 'Not Selected' 1 'Selected'.  
FORMATS filter_$ (f1.0).  
FILTER BY filter_$.  
EXECUTE.
```

```
FREQUENCIES VARIABLES=filter_$  
/ORDER=ANALYSIS.
```

Thank you.
