Dear User,

The DHS website has a whole section on "Using Datasets for Analysis".

<http://www.measuredhs.com/data/Using-Datasets-for-Analysis.cfm>. If you are working with the Individual Recode File, for example India NFHS 2005-06, the file you would want to unzip is iair52sd.zip. In addition to the data, the unzipped file also contains other resources such as weighted and unweighted frequencies, a map of the data, documentation providing details about the data such as country specific variables and other useful information. You may also want to refer the the Standard Recode Manual
