Hello,

I am trying to reproduce:

Users informed about side effect or problems of method used

Users informed what to do if experienced side effects

Users informed about other methods

Do I need to use v3a02 v3a03 v3a04 v3a05 v3a06?

Along with v337 to determine if a woman began using a method over 5 years ago?

I have been unable to perfectly reproduce the numbers in the Afghanistan 2015 report (Table 7.8)

Thanks!

Kristin
