Thanks Erica

I am looking forward to an even more useful STATcompiler. Please consider adding the breakdown of % Asset possession, by income quintile, by rural/urban. This would let us know what % of people in Lowest Quintile in Rural Rwanda have a bike. Are you aware of such dataset, or could you help aggregate it for Gapminder? ( Why? We have started the Dollar Street Project, and we are sending photographers across the world to document living conditions in a systematic way, based on your stats.) /Thanks! Ola
