Thanks Erica

I am looking forward to an even more useful STATcompiler. Please consider adding the breakdown of % Asset possession, by income quintile, by rural/urban. This would let us know what % of people in Lowest Quintile in Rural Rwanda have a bike. Are you aware of such dataset, or could you help aggregate it for Gapminder? (Why? We have started the Dollar Street Project, and we are sending photographers across the world to document living conditions in a systematic way, based on your stats.) /Thanks! Ola
