Hi, I am using DHS 2016 dataset to calculate the percentage of women below 145 cm as in table 11.10.1. The total number is not matching with my calculation using the command as below:

```
use "NPIR7HFL.DTA", clear
```

```
gen wt=v005/1000000  
svyset [pw=wt], psu(v001) strata (v023)
```

```
recode v438 (1025/1449 = 1 "Height less than 145 cm") (1450/1754= 2 "Normal Height"),  
gen(ht_women)  
tab ht_women if v438<9990 [iw=wt]
```

The total number comes 6443 (as against the number in table 6433). Could anyone please suggest where I am making mistake?

Thanks
