Hi, I have a quick question I am hoping someone can help with. I am working with the v304_n variables, wanting to sort them into three dummies; modern, traditional, and folkloric. When I went through the individual variables, I saw one of the value labels in v304_04 is "not in contraception table, but as a current method". I do not understand what this means. Can this be put under yes or no?

Thanks for any help!

Maren
