Hello,

Thank you very much for your reply. I managed to obtain this concatenated code for municipalities for the 1986, 1990, 2005, 2010 and 2015 waves following your advice. However, I could not for the 1995 and 2000 as the 'smunip' is a code from 1 to 61, specific to the DHS for surveyed municipalities that cannot be used with the official (DANE) used to code municipalities... Could you please help me in obtaining/explaining me how to obtain the municipality code used by the Colombian statistical office in the 1995 and 2000 waves?

Thank you for your consideration.

Clotilde
