Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Sorry for the delay with this response.

We use Stata rather than SPSS here at DHS, but I may be able to answer the question IF you can provide more information. Apparently you are not matching some number that appeared in the DHS report. Please identify the specific table and report (the national report on the NFHS-4 or a state report?). What is the number given in the report and what is the number you are getting?
