Following is a response from Senior DHS Stata Specialist, Tom Pullum:

Table 8.20 requires a minor recode of m15_1. Public facilities are those with m15_1 in the range 20 to 29. Private facilities have codes 30-39. If you do that recode and use the weight v005 you will be able to reproduce the denominators in the table. The cost of the delivery comes from the variable s449_1.
