No i am not able to apply weights for lifetable.

ltable timeyears dead

Interval	Beg.	Total	Deaths	Lost	Std.	Error	[95% Conf. Int.]	
0	1	259627	10702	48295	0.9546	0.0004	0.9537	0.9554
1	2	200630	641	49284	0.9511	0.0004	0.9502	0.9519
2	3	150705	271	49084	0.9490	0.0005	0.9481	0.9499
3	4	101350	200	51497	0.9465	0.0005	0.9455	0.9475
4	5	49653	70	49583	0.9439	0.0006	0.9427	0.9450

. ltable timeyears dead [fw=weight]
may not use noninteger frequency weights
r(401);

Under five 56.1 (i.e 1 - 0.9439)which does not match with the National report.
