You are requesting column percentages (col) instead of row percentages (row), and you are asking for unweighted numbers of cases (obs) instead of weighted (count).

Also the svyset should use wt instead of d005 for the weight.

I also added in the selection of v502!=0 to exclude never married women, although that isn't strictly necessary as they drop out anyway.

Try the following:

```
gen wt=d005/1000000
```

```
svyset [pw=wt], psu(v021) strata (v023)
```

```
svy: tab v013 d101a if v044==1 & v502!=0, row count
```
