Variable names that start with "S" are country-specific. The best source of information about them is the questionnaire, which is in an appendix at the end of every main report. These country specific variables are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level.
