This is a country specific variable, and all such variables start with an "S". They are generally named and coded in the same way as they were on the questionnaire. The variable will have a leading "SH" if the question was asked at the household level, a leading "S" if asked at the women's level, and a leading "SM" if asked at the men's level. The variable you are looking for is:

S433A: Suffered from obstetric fistula
