Following is a response from DHS Senior Research Associate, Lindsay Mallick:

Dear user,

It does not seem that your categorization of months/trimesters aligns with the categories presented in Table in 9.2 on timing of ANC. I also wonder if your denominator matches. You can refer to this blog post and corresponding video for more considerations when matching tables: <https://blog.dhsprogram.com/final-report-tables/>.

Here is some code to match Table 9.2:

```
gen wt = v005/1000000
```

```
recode m13_1 (0/3 = 1 " <4") (4/5 = 2 " 4-5") (6/7 = 3 " 6-7") (8/9 = 4 " 8+") (else = 9 "Don't  
know/missing") if v208>0, gen(ancntime)  
replace ancntime = 0 if m14_1 ==0, label 0 "None"  
label define ancntime 0 "No ANC", add  
label var ancntime "Timing of ANC"  
ta ancntime [iw=wt]
```

Best,
Lindsay
