Thanks so much Trevor. When I use the following syntax, I still am a bit off. I register n = 4591 instead of n = 4567:

v213 != 1 & v312 == 0 & (v605 == 5 | v605 == 2) & & v527 >= 100 & v527 <= 399

Any idea where I am going wrong?
