Dear folks,

When tabulating v714 (Respondent currently working), more than 80 percent observations have missing value. Is it correct?

v714 : respondent currently working

	Frequency	%(NA+)	%(NA-)
no	87082	13.3	76.1
yes	27383	4.2	23.9
NA's	541384	82.5	0.0
Total	655849	100.0	100.0

Thank you.

Mrinal
