Dear folks,

When tabulating v714 (Respondent currently working), more than 80 percent observations have missing value. Is it correct?

v714 : respondent currently working

| | Frequency | %(NA+) | %(NA-) |
|-------|-----------|--------|--------|
| no | 87082 | 13.3 | 76.1 |
| yes | 27383 | 4.2 | 23.9 |
| NA's | 541384 | 82.5 | 0.0 |
| Total | 655849 | 100.0 | 100.0 |

Thank you.

Mrinal
