Dear folks,

When tabulating v714 (Respondent currently working), more than 80 percent observations have missing value. Is it correct?

v714: respondent currently working Frequency %(NA+) %(NA-) 13.3 76.1 87082 no 4.2 23.9 27383 yes NA's 541384 82.5 0.0 Total 655849 100.0 100.0

Thank you. Mrinal
