Following is a response from DHS Technical Specialist, Shireen Assaf:

The following code should work for a KR PR merge. I'm using the Rwanda most recent survey as an example.

```
use RWKR70FL.DTA, clear

rename v001 hv001
rename v002 hv002
rename b16  hvidx

* dropping those that are not in the household so we can merge with PR file
drop if hvidx==0 | hvidx==.

sort hv001 hv002 hvidx

save temp.dta, replace

use RWPR70FL.DTA, clear

sort hv001 hv002 hvidx
merge 1:1 hv001 hv002 hvidx using temp.dta

erase temp.dta
```
