I'm using IR datasets from 47 different countries. I know that the question on ever use of each method was dropped between DHS-5 and DHS-6 and asking women whether they have ever used emergency contraception was asked in the context of asking women whether they had ever used a method for each and every method they have heard of in the contraceptive knowledge and ever use table (for example: Have you ever used the pill?, Have you ever used an IUD?, Have you ever used emergency contraception?, and so on for each of about 13 methods in WQ301). Due to that I'm only using datasets from questionnaires 2009 or before.

But still I can't find the variable for "ever used emergency contraception or ever heard about emergency contraception".
