This is ok when both month and year of vaccination are given, but doesn't handle cases where the month is 44, 66, 97, 98, or 99, or the year is 4444, 6666, 9997, 9998, 9999. Nor does it handle the case where the mother reports that the vaccination was given, but no date is given.
