Subject: demand for FP satisfied - modern methods - calculate indicator Posted by geoK on Fri, 10 Aug 2018 12:24:16 GMT View Forum Message <> Reply to Message

Hello! I am trying to calculate the indicator:

"Fpnadmwpdm: Percentage of demand for family planning satisfied by modern methods"

for Congo, DR - 2013, and I can not get the same % as in statcompiler. Would it be please possible to have advice on what exact variables have you used, and possibly get a code in STATA (or any other software), please?

Thanks!
