
Subject: Haiti 2016-17 water categories missing?

Posted by [ianross](#) on Fri, 07 Sep 2018 10:06:21 GMT

I had a question about hv201 (water source for drinking) not matching the questionnaire.

However, a colleague has drawn my attention to the shxxx variables which have the full categories in the original language.

i.e. sh101 is equivalent to hv201

Leaving this here in case someone else has the same issue.
