Hi DHS Support,

I am unable to open the India 2015-16 NFHS4 Stata IR dta file. Whilst the zip file downloads fine, I keep getting an error message when I try to extract the file (please see attached screenshot).

If I try to open the file in Stata it says "data file corrupt. The file unexpectedly ended before it should have".

Any advice on how I can access this file?

Many thanks,

Laura
