Dear User,
CSPro code shows:

S646B(i) = alfa2num(Q645, Q646, "B");

S646C(i) = alfa2num(Q645, Q646, "C");

S646D(i) = alfa2num(Q645, Q646, "D");

Q645 During the time you were sick with cough (CHILD'S NAME) did you take any medicine?

Q646b Antibiotics - tablets

Q646c Antibiotics - syrop

Q646d Antibiotics - injection

The questionnaires do not exist in English. However, you can check a translation app on the internet. If that does not help, please feel free to post again.

Thank you!
