Subject: Re: Spring water source Posted by Liz-DHS on Wed, 31 Oct 2018 15:03:04 GMT View Forum Message <> Reply to Message

Dear User, a response from Senior Data Processing expert, Mr. Guillermo Rojas, Quote:

Based on the information collected in DHS questionnaires, it isn't possible to know what is the source of water piped into households. For any given survey that source could be from an indeterminate number of sources depending on the location of the household.
