I am trying to find the data on the domestic violence module for Bangladesh 2007. When I open the STATA files, there seems to be no available data for the variables, for example physical violence, spouse ever slapped and much more. I have read a lot of papers who used this dataset to carry out their investigations and the results are summarised in the final report so I know it exists. I just can't seem to find it.

Could you please point me in the right direction or explain why the data may no longer be available? Thank you very much!
