Dear Sir

very thankful to your replies

I tried using V008 - B3 < 24 for age, then I got the number of children below 24 as 101955. However, the national report says 95% of the total below 24 has been breastfed, if we take the 95% of this number (96857), again it is not matching with national report number (97989). Could you please let me know if I am making any mistakes

Looking forward to hearing from you  
Regards
