Sreya Pradhan wrote on Wed, 09 January 2019 05:58dear DHS experts,  
I was trying to look at the food consumption pattern if women's in India from the NFHS 2015-2016 Individual recode file. the variable listed for the same v472a, v472b.....v472u. But when I try to tabulate them individually it says no observation.  
If no one responded to those questions where did the report data for the same came from.

I have attached India file for your reference. It shows the consumption of various types of food (daily, weekly, occasionally, or never). Please see from page no 335 section 10.8, Table 10.23, 10.24.1, 10.25.1 it shows distribution by state/union territory.

A quick reply would be helpful

Regards'

Sreya
