---

I have a question regarding question V766A number of sexual partners, excluding spouse, in the past 12 months.

When referring to spouse, are only spouses excluded or do you also include boyfriends/girlfriends?

We would like to do an analysis on "casual partners" so our question is: if we simply use V766A >0 does this mean that this person had at least one casual partner in the past 12 months?

Is there a common term used for those with sexual partners that are not their spouse?
