Hi there Koray

I ran the code and it seems to have worked well.

Interesting to see that child birth year looks like this:

child_birth year	Freq.	Percent	Cum.
-----+-----			
2010	497	4.67	4.67
2011	676	6.35	11.02
2012	2,263	21.27	32.29
2013	2,098	19.72	52.01
2014	2,238	21.03	73.04
2015	1,576	14.81	87.85
2016	1,293	12.15	100.00
-----+-----			
Total	10,641	100.00	

I can only imagine that in 2010 and 2011 there was not full sampling.

And I assume that full sampling did happen in 2016.

Is that what you concluded?

Best Wishes

Sandra
