Thanks Koray

I'm interested in children under 5 in the 2016 survey.

You have a total of 10,006.

I have not yet weighted the data as I'm first trying to establish birth month and year.

But my unweighted total for children under 5 in the 2016 survey is 10,641.

I think I am looking at the right sample, as it's those children included in the hw16 variable (same as b1 and b2).

But I'm worried about the months and years after conversion - see my previous response.

Sandra
