I am trying to analyze the data based on the duration of absent of husband (spousal separation) in Nepal 2016 DHS dataset. I have identified the variable name v505 for husband is away or not but not able to identify the variables for duration away from home. These information are presented in DHS table 3.2 (Nepal DHS published report 2016). Could you let me know the variable name of duration away from home based on table 3.2?
