Subject: A woman's health decisions Posted by leyfh1 on Tue, 26 Feb 2019 19:21:09 GMT

Hi,

I'm interested in the variable stating whether a woman can make the final decisions on her own health or not.

In the IR dataset from 2007 for Bangladesh there are 4 options: the respondent herself, her husband, her & her husband jointly or someone else.

I was just wondering if you could tell me who the "someone else" option means?

Thanks!
