This comment is made on behalf of the Gender Group at The World Bank.

In addition to questions on land rights. It would be important to sex-disaggregate land and asset ownerships. In Household Characteristics, consider collecting up to 2 or 3 IDs of owners/joint owners in the household on the following questions:

- Q118 (number of animals that the household own)
- Q120 (hectares of agricultural land that the household own)
- Q122 (a subset of the listed assets)

Alternatively, in Woman's Questionnaire, consider specifying the following options in Q612 ("Do you own this or any other house either alone or jointly with someone else?") and Q615 ("Do you own any agricultural or non-agricultural land either alone or jointly with someone else?"):

- Jointly with spouse/partner
- Jointly with someone else

The Gender Group at The World Bank would love to continue the discussion and work alongside DHS to develop a more refined instrument in measuring the indicated indicators. Please do not hesitate to email Kathleen Beegle ([kbeegle@worldbank.org](mailto:kbeegle@worldbank.org)) and Daniel Halim ([dhalim@worldbank.org](mailto:dhalim@worldbank.org)).
