Subject: Re: Suggestions to add surgical burden of disease questions Posted by AlexPetersMD on Fri, 15 Mar 2019 20:26:06 GMT View Forum Message <> Reply to Message

This is a very important effort to more fully understand the effect of lack of access to surgical care facing men, women, and children. A huge amount of morbidity related to NCDs is due to lack of surgery, and this data collection will help ministries of health better address that need.
