These requests for revisions are being submitted on behalf of Better Care Network, an international group of experts on children's care and demographers, and USAID's Center for Children in Adversity.

We have included 4 proposed revisions:

- 1) Response categories for relationship to the household head;
- 2) Primary caregiver identification;
- 3) Information on living non-resident parents;
- 4) Duration of parent-child separation.

Thanks for your consideration.

Florence Martin Director Better Care Network
