Dear all,

I want to estimate vaccination coverage using DHS Albania 2017, however there are only information about vaccination card on KR dataset.

For example,

received bcg	Freq.	Percent	Cum.
-----+-----			---
vaccination date on card	1,350	93.49	93.49
vaccination marked on card	94	6.51	100.00
-----+-----			---
Total	1,444	100.00	

According to the report (page 132),

All basic vaccinations coverage

Percentage of children age 12-23 months who received specific vaccines at any time before the survey (according to a vaccination card or the mother's report).

Where can I find data about mother's report?

Thanks in advance for your help!
