Dear all,

I want to estimate vaccination coverage using DHS Albania 2017, however there are only information about vaccination card on KR dataset. For example,

received bcg Fre	•		
vaccination date on card vaccination marked on card	1,350 94	93.49 6.51	93.49 100.00
Total 1,444			-

According to the report (page 132),

All basic vaccinations coverage

Percentage of children age 12-23 months who received specific vaccines at any time before the survey (according to a vaccination card or the mother's report).

Where can I find data about mother's report?

Thanks in advance for your help!
