Hello,

You need to change the path/directory to where your data is located...

This path responds to the place where I had saved the data:

'C:\Users\User1\Documents\MW_2015-16_DHS_05242018_253_52565\MW_2015-16_DHS_030 42019_835_52565_SPSS\MWPR7HSV\MWPR7HFL.SAV'.

If your data is located in the C-drive, under a folder called "MALAWI_DHS", then your path/directory could be:

'C:\BLM\MALAWI_DHS\MWPR7HFL.SAV'.
