Subject: Educational Attainment among young women in northern Nigeria

I'm fact-checking a claim that '50% of young women in northern Nigeria have no formal education'.

I've looked at the DHS 2013 report and found figures for educational attainment for women ages 15-49 in all geopolitical zones of Nigeria.

Please, how can I get figures for women with no education in the North West, North Central and North East in these two age ranges: 15-24 and 18-35?

Thanks.
