Hello. I am working with the Armenia DHS data for my dissertation and have a question about sampling, more so for descriptive purposes. I see in the 2000 and 2015-16 ADHS that in the sections about sampling in the final report, the number of EAs in the sampling frame from which PSUs were chosen is provided (1023 for 2000 ADHA and 11571 for 22015/16 ADHS). I can't seem to find this information for the other 2 collection years. Is there somewhere that this information can be found?

Thank you!
