Dear DHS team,

I would like to confirm my STATA analysis on 8 IYCF core indicators for Indonesian DHS 2012. I found slightly different rates for most indicators. I have followed the discussion in DHS forum and applied the syntaxes.

Here are my findings and the differences with the DHS report:

| Indicator   | My analysis DHS report Differences |          |       |
|---|------------------------------------|----------|-------|
|   | Rate (%)                           | Rate (%) |       |
| Early Initiation of breastfeeding (0-23mo)                | 50.02                              | 49.30    | 0.72  |
| Exclusive Breastfeeding (0-5mo)                           | 42.61                              | 41.50    | 1.11  |
| Continued Breastfeeding at 1 year (12-15mo)               | 77.21                              | 77.00    | 0.21  |
| Introduction to Soft and Semi Solid Food (6-8mo)          | 90.37                              | 91.00    | -0.63 |
| Minimum Dietary Diversity (6-23mo)                        | 58.20                              | 58.20    | -     |
| Minimum Meal Frequency (6-23mo)                           | 65.80                              | 66.10    | -0.30 |
| Minimum Acceptable Diet (6-23mo)                          | 36.14                              | 37.00    | -0.86 |
| Consumption of Iron-rich or iron-fortified foods (6-23mo) | 54.21                              | n/a      |       |

I am sending you my syntaxes in attachment, I have checked several times, but could not figure out the reason for such discrepancy.

many thanks for your help

warm regards

Ha'i
