Following is a response from our Research & Data Analysis Director, Tom Pullum:

It's possible that the problem could be due to the use of a different calendar (months/years, not the DHS calendar!) in Ethiopia. That seems unlikely to me, because this survey is internally consistent; ALL dates in the data are given in the Ethiopian version. Is there anything in the report or on STATcompiler that you can calibrate with?

Sorry--I'd like to help but just don't have time to review your code.
